editorial

Integrity is a concept of consistency of actions, values, methods, measures, principles and morals. It is among the fundamental values that employers seek in those hired and is the hallmark of a person who demonstrates sound moral and ethical principles at work. A person with integrity lives his or her values in relationship with colleagues, customers and stakeholders. Honesty and trust are central to integrity.

STIDC is committed to adopting integrity as a culture. The annual integrity day has been in its calendar of events since 2010 to promote integrity in service delivery.

STIDC strives to ensure continuous improvement in its work processes and service delivery systems. Towards that end, staff was trained as Certified Integrity Officer (CEIO) and Corruption Risk Management (CRM) document was initiated. STIDC also became the first state statutory body certified under the Anti Bribery Management System ISO 37001:2016 standard. At the same time, the Organizational Anti Corruption Plan (OACP) is underway.

Meanwhile, the Integrity Division was initiated in consonance with the proposal of the Integrity and Ombudsman Unit and the aspiration of the Chief Minister of Sarawak to strengthen the Integrity Unit throughout the state civil service.

In tandem with this, various initiatives were taken including the monthly integrity pledge, Anti-Corruption Committee Meeting, developing and using online service delivery systems, enhancing work processes through MS ISO 9001:2015 as well as Innovative and Creative Circle (ICC) activities, Lean Management and Key Focus Activity (KFA).

Parallel with the state government digital technology initiative, STIDC is also developing the Big Data to strengthen the management of the wood-based industry of Sarawak. This system is poised to become a one stop centre for the agencies requiring data related to the industry including the registration application process, export activities, enforcement as well as market analysis. These initiatives are timely to spur the economy of the state.

STIDC Committed To Developing Human Capital

Sarawak Timber Industry Development Corporation (STIDC) is committed to its vision 'Spearheading The Advancement Of Timber Industry' and mission 'We Strive To Regulate And Facilitate The Advancement Of An Innovative Timber Industry'.

In tandem with the said vision and mission, STIDC subscribes to the development of human capital through ongoing training programmes to enhance knowledge and skills and to meet the demand of the industry. This is to help the industry to produce value-added products and compete in the global market.

Presently, several trainings are available at the Tanjung Manis Timber Training Centre (TMTTC). These include Wood Anatomy and Identification (GRA I), The Sarawak Log Grading Rules (GRA II), The Malaysian Grading Rules For Sawn Hardwood Timber (GRA III), Basic Woodworking & Carpentry (FUR I), Introduction To Furniture Making Techniques (FUR II), Furniture Designing & Constructing (FUR III), Introduction To Wood Carving Techniques (SUK II), Wood Carving & Constructing (SUK III) and Introduction To EPOXY Technology

In Furniture Making. Nearly 300 industry workers and school leavers were trained at TMTTC in 2017-2019.

The trainings are conducted, supervised and assessed by certified trainers from STIDC who have Vocational Training Officer (VTO) Certificate. Presently, there are 16 certified VTOs to facilitate the training programmes.

By upgrading and registering TMTTC with the Department of Skills Development (DSD), TMTTC is poised to become a certified training provider and recognised by DSD to offer the Malaysian Skills Certificate (Sijil Kemahiran Malaysian). This is to help the trainees to secure employments as well as to pursue their training.

The initiative is timely in meeting the demand for skilled workforce in consonance with STIDC's stride to transform and make the local wood-based industry a high income generator by 2030.

STIDC hopes to get more training programmes registered and certified under SKM certificates particularly the Timber Grading SKM Level III, Wood-based Building Construction SKM Level I and II

as well as Vocational Training Operation SKM Level III.

With the approval of new trainings, TMTTC hopes to get overwhelming response particularly from the wood-based industry workers, STIDC furniture vendors and school leavers to acquire relevant skills. TMTTC strives to promote the trainings among the wood-based entrepreneurs nationwide.

TMTTC also aims to participate actively in relevant competitions such as Worldskills Malaysia in order to encourage healthy competition and knowledge sharing among the trainees and facilitators.

"Plans are underway to enhance the skills of the existing workers in accordance with the required quality standards. Through these training programmes, we hope to elicit technically skilled workforce to meet the demand of the industry besides retaining their talents and skills for common good," Haji Hashim Haji Bojet, STIDC General Manager said.

For enquiries, kindly contact our Industrial Training Manager at 082-473000 or norhanb1@pusaka.gov.my

Aluminium Kitchen Cabinet Making and Installing

STIDC plays pivotal role in developing skilled workforce to meet the needs of the wood-based industries in Sarawak including the furniture sector through training programmes.

Ongoing trainings and courses are being carried out at the STIDC Furniture Industrial Complexes in Kota Samarahan and Tanjung Manis to equip the people particularly school leavers and to meet the demands of the industries.

This was evident by the Aluminium Kitchen Cabinet Making and Installing Course held at the STIDC Furniture Industrial Complex, Kota Samarahan.

The course focused on the introduction to extrusion components for cabinet making, introduction to machinery and

accessories, introduction to various types of joinery, grinding technique, finishing technique and costing.

Through this initiative, STIDC hoped to equip the participants with the latest technique on aluminium kitchen cabinet making and Installing engineering. At the same time, it also aimed to help them to produce value-added products in order to generate income as well as to create business and employment opportunities. It was also part of STIDC's ongoing programmes to develop and help its furniture vendors to penetrate and compete in the open market.

The course was attended by 31 participants comprising the STIDC staff and furniture vendors. The course was jointly organised by the Furniture Industry Technology Centre (FITEC) and STIDC on 7-11 October 2019.

Course facilitators and participants. •

Identification of Timber Products, Documentation and Customs Procedures

STIDC continues to play important role in processing and approving the Import and Export Licences of timber and timber products for Sarawak in accordance with the Customs Act 1967 and the authority vested by the Royal Malaysian Customs Department since 1992.

To enhance competency in handling the processing and approving of Import and Export Licences, a course on Identification of Timber Products, Documentation and Customs Procedures was organised on 1-2 October 2019 at STIDC Headquarters in Kuching, Sarawak. The course was facilitated by the Royal Malaysian Customs Department and the Malaysian Timber Industry Board (MTIB) officials.

Haji Hashim Haji Bojet, STIDC General Manager hoped that the course would foster co-operation with the related government agencies besides ensuring the right use of tariff codes and smooth physical inspection at the designated entry points.

He disclosed that timber and timber products accounted for RM5.4 billion in 2018 compared with RM6.1 billion in 2017

adding that the wood-based sector is the fourth income generator for Sarawak after liquefied natural gas, petroleum and petroleum products and palm oil.

He elaborated that the export licences issued in 2018 were 15,000 compared with 18,000 in 2017. Import licences issued in 2018 increased to 1,186 from 471 in 2017. Importation of raw materials is encouraged to meet the needs of the industry.

“Obviously, the wood-based sector is important to our economy. Transformation plan is in place to ensure innovation as well as to promote value-added products in tandem with the aspiration to achieve RM6 billion from furniture export by 2030. Hopefully, co-operation with the related agencies will continue for the best interest of the industry,” he said.

Course facilitators and participants.

STIDC Subscribes To Integrity

Datuk Amar Haji Awang Tengah (middle) launching the STIDC Anti Bribery Management System (ABMS) while the other VIPs look on.

Tuan Haji Hashim Haji Bojet, STIDC General Manager (centre) leading his management members and staff in reaffirming the integrity pledge.

Integrity is vital in ensuring that the services are rendered at their best in line with the Malaysia Day theme 'Love Malaysia: Clean Malaysia'.

Integrity should be practised across the board in order to make it a culture and to boost the confidence of the industry and stakeholders.

STIDC subscribes to integrity and other values such as competency, accountability and transparency besides adhering to rules and regulations and standard operating procedures.

STIDC reciprocates to the government's call for integrity, work ethics and innovation by organising the integrity day since 2010 parallel with its vision

'Spearheading The Advancement Of Timber Industry'. This year's integrity day was held on 16 October 2019 at Wisma Sumber Alam, Kuching.

Datuk Amar Haji Awang Tengah Ali Hasan, Deputy Chief Minister of Sarawak and Chairman of STIDC Board of Management described the event as timely in imparting a sense of integrity among his staff to combat corruption.

He urged them to always uphold the State Civil Service shared-values namely Integrity, Professionalism, Sense of Urgency, Kind & Caring, Result Oriented and Teamwork.

Towards that end, he said, various committees were formed by the Board of Management to look into projects,

investment, land, finance, audit and risk management. The formation of these committees augured well with the aspiration to achieve a world class State Civil Service.

"Congratulations to STIDC for initiating the Integrity Division and at the same time having a Certified Integrity Officer to acculturate integrity among the staff. The expansion of online services by STIDC was timely in enhancing productivity besides promoting transparency and integrity," he said.

He hoped that the Corporation would continue to uphold integrity in delivering its services in order to project positive image and gain greater confidence from the industry and other stakeholders.

STIDC Won Gold Award

The Hummer Circle of STIDC won gold award for its innovative and creative project on Inefficient Timber Marking Method MAX-ZWAGER.V3 at the International Convention on Quality Control Circles 2019.

The convention was held in Tokyo on 23-26 September 2019 featuring 300 Innovative and Creative Circles (ICCs) from 16 countries including Malaysia.

MAX-ZWAGER.V3 is the timber marking tool using an innovated pull and release mechanism. Based on 15,964 pieces of timber, marking using MAX-ZWAGER.V3 could be done in four days compared with 166 days using hammer. It saves cost by 326 percent, from USD4,375 to USD102.

STIDC is committed to rendering quality

services in consonance with the national long-term development programme (TN50) to make Malaysia the top 20 country in the world by 2050. One of the objectives of TN50 is to develop innovative and creative civil servants through bottom-up approach.

"This achievement marked a new milestone in our quest for continuous improvement. Although we are proud of our achievements, we will not be complacent. We hope to inculcate innovative and creative culture among the staff of STIDC and its subsidiaries," Haji Hashim Haji Bojet, STIDC General Manager said.

Meanwhile, Bernie Thomas, Team Leader of The Hummer was grateful that their hard work finally paid-off. He attributed

their achievement to team spirit among his members.

"I am delighted that The Hummer once again made STIDC proud. This time, on international stage. On 18-20 October 2017, our team managed to achieve 4-Star Award for our SHARK project (innovative portable table saw ideal for cottage furniture industry). In 2015, we secured third place in the State Level ICC Convention and Gold Award in the Sabah-Sarawak Regional Team Excellence Convention initiated by the Malaysia Productivity Corporation(MPC). I would like to thank our management members for their guidance and undivided support in ensuring our success," he said.

STIDC has been participating in the Innovative and Creative Circle since 2011.

The participants listening attentively to the facilitator, Mohammad Zaim bin Kassim.

Tuan Haji Hamzah Haji Morshidi, Resource Planning Division Assistant General Manager (fifth left) expressing his appreciation to Lee Ling Timber Sendirian Berhad camp manager, Mr. Yeo Sing Teck.

Tuan Haji Hamzah Haji Morshidi addressing the participants.

Tripartite Co-operation Vital To Create OSH Culture

Occupational Safety and Healthy (OSH) is an integral part of our lives and warrants serious attention by all parties including the government, employers and employees. Occupational accidents particularly those that caused fatality pose adverse impacts to the affected parties. For employers, fatal accidents result in loss of talents and skills which affect productivity and tarnish reputation. For employees, fatal accidents cause loss of loved ones and sources of income.

Concerted efforts were made by the Department of Occupational Safety and Health (DOSH), Sarawak Timber Association (STA) and STIDC to promote OSH awareness in the wood-based sector in Sarawak. OSH Campaign was mooted in 2015 by the three agencies to address OSH issues in this sector. Since then, the agencies continue to organise the campaigns across the state to inculcate OSH culture at workplaces. The latest campaign was hosted by Lee Ling

Timber Sendirian Berhad at Lubuk Lalang Base Camp in Limbang Division on 5-6 November 2019.

Various topics were discussed during the campaign including the Occupational Safety and Health Act 1994 (OSHA); Hazard Identification, Risk Assessment and Risk Control (HIRARC); Occupational Safety and Health Committee at Workplaces; Notification of Accident, Dangerous Occurrence, Occupational Poisoning and Occupational Disease Regulation 2004 (NADOPOD) and Use and Standard of Exposure of Chemicals Hazardous to Health (USECHH Regulation). OSH audit was also conducted at the workshop, staff quarters and operation zones including log-pond and felling area.

“Forest certification is important in the forestry sector. Under this initiative, safety and health of employees is a prerequisite to get forest concessions certified. It is, therefore, vital to view certification and OSH seriously in order to comply with the global

market requirements,” STIDC General Manager, Haji Hashim Haji Bojet said.

Meanwhile, Mohammad Zaim bin Kassim, facilitator and DOSH senior officer emphasised that organisations must be aware of the hazards at workplaces and manage employees’ safety and health effectively in order to prevent occupational accident. He added that employers and employees are equally responsible for OSH by making it a culture.

“Tripartite co-operation among the government, employers and employees on OSH should be intensified. All policies, strategies and programmes related to OSH warrant undivided support from the three parties in order to achieve the desired results,” he added.

Participant, Shamy Kisan commented that the campaign was beneficial to both the employers and employees because OSH is everyone’s business and hoped it would be extended to other companies for mutual benefits.

Tuan Haji Hamzah Haji Morshidi, Resource Planning Division Assistant General Manager (seated fourth left) posing with the facilitators and participants.

2019

market performance

for JANUARY to SEPTEMBER

Export Value of Logs & Timber Products

Export volume of logs and timber products for the third quarter of 2019 declined by 11% to 2,453,310 m³ from 2,762,283 m³ during the third quarter of 2018. This led to weaker export value by 12% to RM3.5 billion from RM4.0 billion.

Japan, being the major consumer, accounted for 48% of the total export value at RM1.7 billion.

Plywood, logs and sawn timber contributed 79% and RM2.8 billion to the overall export value. The balance were contributed by value-added products including fibreboard, veneer, moulding, dowel, block-board, particle board, finger-joints, laminated board, furniture and other timber products. **(Table 1)**

Logs

Export volume of logs decreased by 1.8% to 993,128 m³ compared with 1.0 million m³ during the third quarter of 2018. The export value also dropped by 1% to RM547 million from RM552 million.

Despite being the top consumer, Indonesia registered a decrease in consumption volume by 5% to 462,903 m³ and worth RM99 million.

The average FOB unit value of logs increased by 0.8% from RM546 per m³ to RM550 per m³. **(Table 2)**

Sawn-timber

The export volume of sawn timber declined by 12% to 243,310 m³ from 276,159 m³ during the third quarter of 2018. The export value also dropped by 7% to RM451 million from RM486 million.

The Middle East was the leading consumer with 10% increase in export volume to 74,829 m³ during the third quarter of 2019 from 68,003 m³ during the same period last year. Other major consumers were the Philippines at 58,411 m³ (decreased by 35%) and Thailand at 39,402 m³ (increased by 15%).

The average FOB unit value of sawn timber rose by 5% to RM1,854 per m³ from RM1,760 per m³ during the third quarter of 2018. **(Table 3)**

Plywood

Export volume of plywood declined by 21% to 854,948 m³ compared with 1,078,053 m³ for the third quarter of 2018.

The export value also dropped by 22% to RM1.8 billion from RM2.2 billion.

Export volume to Japan decreased by 23% to 556,302 m³ from 727,137 m³ during the same period last year. Export value also dropped by 20% to RM1.24 billion compared with RM1.55 billion.

This was followed by the Middle East (increased by 9%) and Korea (decreased by 33%).

The average FOB unit value of plywood dropped by 1.3% to RM2,057 per m³ from RM2,084 per m³. **(Table 4)**

Other Timber Products

Other timber products included veneer, dowels, mouldings, particle board, fiberboard, block board, laminated board/flooring, woodchip and others as mentioned in Table 1. These products contributed RM720 million and 21% of the overall export value of logs and timber products.

A decrease in export volume was recorded for veneer (23%), laminated board/flooring (3%), moulding (31%), dowel (36%), block-board (42%) and particle board (17%). Growth, however, was recorded for fiberboard (4%) and woodchip (43%). **(Table 5, 6, 7, 8, 9, 10 & 11)**

Conclusion

Export of plywood declined due to reduced demand from Japan and South Korea. Japan increased its plywood production by 57%. Sarawak also competes with other producers such as Indonesia, Vietnam and China in terms of pricing.

The situation was aggravated by consumers opting for other products and escalating cost of production. This trend might continue till year end.

The 2019 total export earnings is forecasted to drop to RM4.7 billion from RM5.4 billion in 2018.

Excellence & Harmony

WOOD CARVING is a tradition and living legacy of the people of Sarawak reflecting the diversity of cultural experiences and moods. It is a tradition that has brought to light the resourcefulness and skills of our people since time immemorial. Wood carving depicts a continuous evolution of man and his forest environment, working towards its esteemed goals of harmony and excellence.

The wood carving training programme conducted by STIDC serves to impart and develop carving skills amongst the younger generation to preserve and nurture this priceless cultural heritage.
